PROFESSIONAL SUMMARY

Full-Stack Web Developer specializing in JavaScript, Vue.js, and Nuxt.js, experienced in building modern and scalable web applications. Skilled in .NET and SQL Server for backend development and data-driven systems. Former QA professional with a strong attention to detail, focused on delivering reliable, high-performance user experiences.

EXPERIENCE

Techbodia Co., Ltd
- **Full-Stack Developer (July 2024 – Present)**
  - Specialized in frontend architecture using Vue.js and Nuxt, building responsive, high-quality UIs aligned with designer specifications.
  - Developed reporting modules, user/permission management (AAA), theming, promotions, and payment features.
  - Worked with .NET and SQL Server for backend development, including database design, queries, and API integration.
  - Integrated third-party APIs to enhance functionality and improve user experience.
  - Managed production releases, ensuring smooth deployment and stable performance in live environments.
  - Provided support and troubleshooting, addressing user issues.
  - Leveraged QA experience to deliver maintainable, bug-free releases and optimize code quality.

- **QA Engineer (July 2023 – July 2024)**
  - Performed end-to-end testing of web applications to ensure functionality, usability, and performance.
  - Created automated test scripts and strategies to minimize production bugs.
  - Collaborated with developers to identify and resolve issues early, improving product quality.

Technovage Solution Co., Ltd
- **Flutter Developer (Jan 2023 – Apr 2023)**
  - Implemented UX/UI and integrated REST APIs.
  - Developed features for School Notify App, improving workflows.

- **Software Tester (Apr 2022 – Apr 2023)**
  - Executed test cases, logged bugs, and collaborated on fixes.
  - Managed tasks and reports using JIRA and Trello.

TSD Company Co., Ltd
- **Web Development Intern (Jun 2021 – Oct 2021)**
  - Enhance backend and frontend for a POS system.
  - Provided client support and training on the system.
